

Kakariki

Look closely at the kakariki in each flight (cage).

Colour each bird's head to match the kakariki you see. Answer the questions below.

1. Red-crowned Parakeet

What introduced predators have made parakeet numbers go down?

What are people doing to help reintroduce red-crowned parakeets to the wild?

2. Yellow-crowned Parakeet

Where in the wild are yellow-crowned parakeets still common?

Where in the forest do parakeets nest?

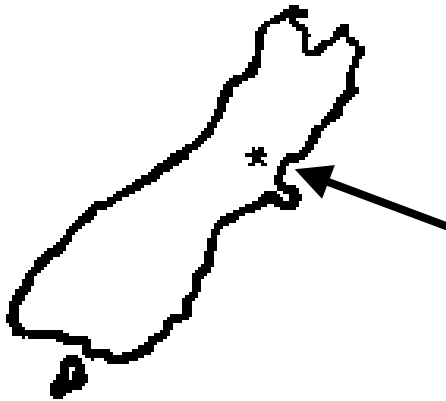

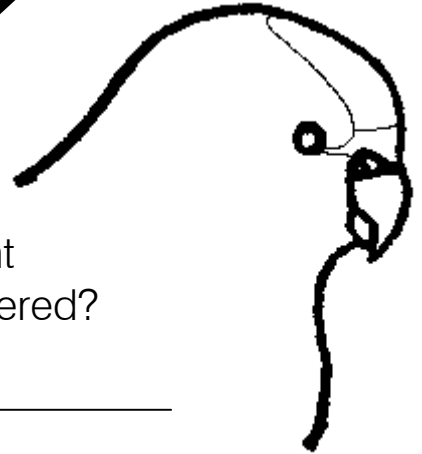

Kakariki

3. Orange-fronted Parakeet

Orange-fronted parakeets were thought to be extinct. When were they rediscovered?

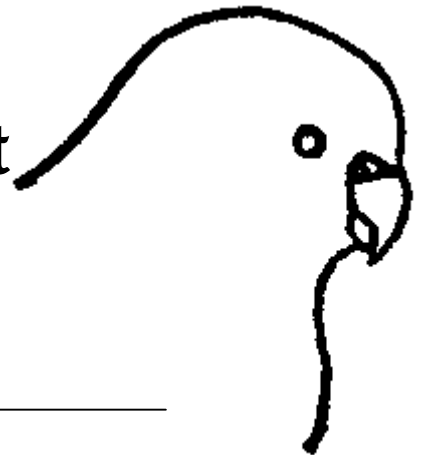

Name the place where orange-fronted parakeets were rediscovered.

4. Antipodes Island Parakeet

Why are these New Zealand parakeets in captivity?

Antipodes Island parakeets eat tussock, seeds and berries. What else do they eat?

Where are the Antipodes Islands?

Can you circle them on the map?
