

Nine Year Feedback

In response to the request for feedback I make the following comments.

1. There is the need for a really positive slogan highlighting Dunedin.
2. Then a major and continuing promotion of the wonderful things here on offer in Dunedin, not only locally but nationally and if an opportunity arises, internationally. We have so much to offer.
3. It is great to see that the Middlemarch railway is on the plan and now we need also to really push for the rail link to Christchurch so we are all connected.
4. We need to find out how much tax is paid from the South Island and how much actually comes back. What a difference funding from there would make for the University, the Polytechnic and surely funding for a full rebuild of the hospital to be fit for the purpose, not only now but for the next 20 years.
5. We need more parking in the city particularly near the hospital, Sunday parking fees are not going to address that at all.
6. I note public toilets are not included on the list. I don't think that is a problem but what is happening about the historic toilet on the market reserve?
7. The other projects sound really positive.

I look forward to excellent outcomes.
