Subject: Official information request - drinking water quality monitoring data

Hello,

This is a request for information under the Local Government Official Information and Meetings Act 1987.

Please provide:

1. The most recent 12 months of drinking water quality monitoring results for each supply zone or scheme that Dunedin City Council operates, including where measured: free available chlorine (minimum, median and maximum), pH, turbidity, E. coli and total coliforms.
2. The most recent chemical determinand results for each treatment plant or scheme, including metals, trihalomethanes, haloacetic acids, fluoride and nutrients, with measured values, units and detection limits.
3. The water source and treatment process for each scheme, where not already published on your website.

This is monitoring data already collected under the Drinking Water Quality Assurance Rules, so I expect it is readily available. A machine-readable format such as CSV or Excel is preferred where possible, otherwise PDF is fine.

Please acknowledge receipt. I understand a decision is required within 20 working days.

Thank you,

Please find attached the Excel spreadsheet containing the monitoring data held for the period July 30, 2025 to July 30, 2026 from water distribution zones supplied from Mt Grand.

Staff provided the following notes in relation to the attached data:

1. 1 Law Road low FACs – occurrences from install around November 2025 – ongoing issue with low turnover and Network managing with regular flushing
2. Mt Grand Lime Pipework Burst - 11/02/2026 – pH at 8.8 above the 7.0 to 8.5 aesthetic range provided by TA – Investigation report available if needed
3. MAVs/levels checked

I trust this is the information sought.

You have the right to seek an investigation and review by the Ombudsman of this decision. Information about how to make a complaint is available at www.ombudsman.parliament.nz

kā mihi
