Subject: Submission of Willowcroft Limited - Residential Rezone of Part of 60 Huntly Road, Outram and use of Balance for Wastewater Infrastructure
Date: Thursday, 4 March 2021 08:37:46 p.m.
Attachments: [Submission Form 5 - Willowcroft Ltd - Residential Rezone of 60 Huntly Road.PDF](#)
[Variation 2 Submission Notes - Willowcroft Ltd - Residential Rezone of Part of 60 Huntly Road & SPMA.pdf](#)
[Variation 2 Submission Notes - Willowcroft Ltd - Table 1.pdf](#)

Hi,

Please find attached the following documents forming the submission of Willowcroft Limited in relation to the residential rezone of part of 60 Huntly Road and the use of the balance for wastewater infrastructure to service Outram.

- Completed Form 5;
- Submission Notes; and
- Table 1.

Please confirm receipt of this email.

Cheers,

Emma Peters Consultant Sweep Consultancy Limited P.O. Box 5724 Dunedin 9054 Phone 0274822214 www.sweepconsultancy.co.nz

VARIATION 2 – ADDITIONAL HOUSING CAPACITY

SUBMISSION FORM 5

SECOND
GENERATION
DISTRICT PLAN

CLAUSE 6 OF FIRST SCHEDULE, RESOURCE MANAGEMENT ACT 1991

This is a submission on Variation 2 to the Second Generation Dunedin City District Plan (2GP). Your submission must be lodged with the Dunedin City Council by midnight on 4 March 2021. All parts of the form must be completed.

Privacy

Please note that submissions are public. Your name, organisation, contact details and submission will be included in papers that are available to the media and the public, including publication on the DCC website, and will be used for processes associated with Variation 2. This information may also be used for statistical and reporting purposes. If you would like a copy of the personal information we hold about you, or to have the information corrected, please contact us at dcc@dcc.govt.nz or 03 477 4000.

Make your submission

Online: www.dunedin.govt.nz/2GP-variation-2 | Email: districtplansubmissions@dcc.govt.nz

Post to: Submission on Variation 2, Dunedin City Council, PO Box 5045, Dunedin 9054

Deliver to: Customer Services Agency, Dunedin City Council, Ground Floor, 50 The Octagon, Dunedin

Submitter details (You must supply a postal and/or electronic address for service)

First name: Willowcroft Ltd

Last name:

Organisation (if applicable):

Contact person/agent (if different to submitter): Emma Peters, Consultant, Sweep Consultancy Ltd

Postal address for service: P.O. Box 5724

Suburb:

City/town: Dunedin

Postcode: 9054

Email address: emma@sweepconsultancy.co.nz

Trade competition

Please note: If you are a person who could gain an advantage in trade competition through your submission, your right to make a submission may be limited by clause 6(4), Schedule 1 of the Resource Management Act.

I could gain an advantage in trade competition through this submission: Yes ☒ No

If you answered yes, you could gain an advantage in trade competition through this submission, please select an answer:

- Yes No My submission relates to an effect that I am directly affected by and that:
- a. adversely affects the environment; and
 - b. does not relate to trade competition or the effects of trade competition.

Submission

Submissions on Variation 2 can only be made on the provisions or mapping, which are proposed to change or alternatives that are clearly within the scope of the 'purpose of the proposals', as stated in the Section 32 report. Submissions on other aspects of the 2GP are not allowed as part of this process.

You must indicate which parts of the variation your submission relates to. You can do this by either:

- making a submission on the Variation Change ID (in which case we will treat your submission as applying to all changes related to that change topic or alternatives within the scope of the purpose of that proposal); or
- on specific provisions that are being amended.

The specific aspects of Variation 2 that my submission relates to are:

Variation 2 change ID (please see accompanying Variation 2 – Summary of Changes document or find the list on www.dunedin.govt.nz/2GP-variation-2)

Rezone of part of 60 Huntly Rd to Township 1 Settlement, balance to be used for wastewater infrastructure, & application of a SPM#

Provision name and number, or address and map layer name (where submitting on a specific proposed amendment):

All provisions relating to NDMA

For example: Rule 15.5.2 Density or zoning of 123 street name.

My submission seeks the following decision from the Council: (Please give precise details, such as what you would like us to retain or remove, or suggest amended wording.)

- ☒ Accept the change
- ☒ Accept the change with amendments outlined below
- ☐ Reject the change
- ☒ If the change is not rejected, amend as outlined below

See attached submission notes

See attached submission notes

Reasons for my views (you may attach supporting documents):

If you wish to make multiple submissions, you can use the submission table on page 3 or attach additional pages.

See attached submission notes

Hearings

Do you wish to speak in support of your submission at a hearing: ☒ Yes ☐ No

If others make a similar submission, would you consider presenting a joint case at a hearing: ☒ Yes ☐ No

Signature:

Emma Peters, Consultant, Sweep Consultancy Ltd.

Date: 4/3/21

Submission:

1. Rezone Part of 60 Huntly Road, Outram Township and Settlement and Apply a Structure Plan Mapped Area.

Reasons:

- Experienced severe shortage of residential capacity in Dunedin, including in this locale, rezoning the site will help to satisfy short through to long term demand with sufficient capacity to meet Council's obligations pursuant to *NPS-UD 2020*. The s32 analysis is deficient in its assessment of demand and available residential capacity in this locale and does not consider sufficiently alternatives.
- Rezone meets rezoning criteria specified in 2GP (see 2.6.2.1) – in particular, it provides a logical extension of residential zones over a limited area which is close to services and public amenities. It provides a much needed infrastructure opportunity for Outram to move, over time, to a reticulated wastewater system.
- Provides for flexibility of development in this locale for which there is experienced high demand for more residential capacity.

In the alternative, rezone the entire site Township and Settlement and/or Large Lot Residential 1.

Scope provided through s32 report not considering all alternatives to alleviate residential capacity shortages in this locale.

2. Do not Apply a NDMA over the Site and Instead Apply a Structure Plan Mapped Area

Reasons:

- Provision of infrastructure is adequately governed by existing subdivision and land use performance standards in the 2GP and the subdivision process itself.
- The application of the Structure Plan Mapped Area provides the opportunity for Council to insert performance standards necessary to achieve desired outcomes for this specific site. This is a more appropriate methodology than applying the NDMA to the site.
- The NDMA provisions will, in this case, act as an impediment to development.

In the alternative, the submitter requests changes to the NDMA provisions as set out in Table 1 of these submission notes. Table 1 contains the NDMA related provisions, issues and potential solutions.

On the submission form the submitter states that their submission relates to *"All provisions relating to the New Development Mapped Area"*. In the event that Table 1 is not a complete list of all such provisions, the submitter reserves the right to make comment in evidence on any other NDMA related provisions which are found to be missing from Table 1.

Figure 2: Indicative Sketch for Basis of Structure Plan – Subject to Preparation of a Structure Plan

Notes:

- Area bordered Pink = Township & Settlement (reticulated services).
- Area bordered Aqua = Area in which to develop wastewater infrastructure that can over time have treatment modules added to cater for all of Outram and make some provision for stormwater infrastructure. It is envisaged this area will have indigenous plantings, wetlands and may also be able to cater for public access. Subject to engineering input on actual quantum of land required.

Variation 2 Submission Notes – Willowcroft Limited – Residential Rezone of Part of 60 Huntly Road, Outram and Provision of 3 Waters Infrastructure on the Balance of 60 Huntly Road

Rule 9.9.Y

9.9.Y Wastewater management plans

1. Any application for subdivision, multi-unit development or supported living facilities in a new development mapped area specified in Rule 9.6.2.Y must include a proposed wastewater management plan that ensures that all wastewater from the future development of the entire new development mapped area does not exceed the capacity of the wastewater public infrastructure network via the use of a communal wastewater detention system, unless such a system has already been approved for the site and will be connected to.
2. The wastewater management plan must be prepared by a chartered engineer and meet the following requirements:
 - a. Specify the design and location of one or more communal wastewater detention systems to detain wastewater from the entire new development mapped area.
 - b. The communal wastewater detention systems must:
 - i. have the capacity to detain wastewater for a 24-hour period, prior to releasing to the wastewater via a connection to the wastewater public infrastructure network. The volume of wastewater to be detained will be calculated with reference to Part 5 of the Dunedin Code of Subdivision and Development 2010 (Code of Subdivision);
 - ii. be compatible with DCC's Supervision Control and Data Acquisition (SCADA) system;
 - iii. have a minimum 20 year expected life for all electrical / mechanical components and a minimum 50 year expected life for all civil components;
 - iv. where practicable, be located such that all flow goes to one communal wastewater detention system with no pumping;
 - v. have components and materials that comply with the DCC's 3-Waters Approved Product and Manufacturers List and Part 5 of the Dunedin Code of Subdivision and Development 2010 (Code of Subdivision).
3. The wastewater management plan must be submitted along with the written approval of all landowners within the new development mapped area unless they are the applicants. (Change F3-2)

<p>Y In the following new development mapped areas all subdivision activities multi-unit development and supported living facilities. (Change F3-2)</p> <ul style="list-style-type: none"> • Kalkorai Valley Road (Change IN07) • Selwyn Street (Change RT22) • Wattle Fox Lane (Change RT21) <p>a. Effectiveness and efficiency of wastewater management and effects of wastewater from future development</p>	<p>Relevant objectives and policies (in addition to those outlined in 9.6.2.2 and 9.6.2.X above)</p> <p>1. Objective 9.2.1</p> <p>ii. Require subdivision, multi-unit development or supported living facilities in specified new development mapped areas to provide or connect to a communal wastewater detention system that ensures that all wastewater from the future development of the entire new development mapped area does not exceed the capacity of the wastewater public infrastructure network (Policy 9.2.1.BB). (Change F3-2)</p> <p>General assessment guidance</p> <p>iii. The identified new development mapped areas are serviced for wastewater but new connections to the network will not be allowed (and consequently any multi-unit development, supported living facility or subdivision that will lead to development that will require a connection will likely be declined) until capacity constraints are resolved or a communal on-site wastewater detention system that is designed for and associated with subdivision and/or development of 50 or more residential units is integrated into the public network and vested in the DCC. After installation of the system, all activities that create wastewater will be required to connect to the system until it is no longer required.</p> <p>iv. In assessing the appropriateness of a proposed communal on-site wastewater detention system, Council will consider the proposed wastewater management plan submitted with the application (see Special Information Requirement - Rule 9.9.Y). (Change F3-2)</p> <p>Conditions that may be imposed</p> <p>v. A requirement for the communal on-site wastewater detention system to be installed prior to certification of the survey plan pursuant to section 223 of the RMA</p> <p>vi. A requirement for the communal on-site wastewater detention system to be vested in the DCC, along with a site containing it which is of a minimum 500m² in area and suitable for residential development.</p> <p>vii. A requirement for necessary easements and a fixed maintenance or defect period agreement to be in place prior to vesting the communal on-site wastewater detention system and associated land. (Change F3-2)</p>

Only allow subdivision activities in a new development mapped area where: <ol style="list-style-type: none"> an on-site stormwater management system that is designed for the whole NDMA and is installed in full or in planned stages prior to development will ensure there is no increase in the pre-development peak stormwater discharge rate from the site into the stormwater public infrastructure (at any point), or where this is not practicable, any adverse effects from an increase in discharge on the stormwater public infrastructure are no more than minor (Policy 9.2.1.V), (Change F2-2)
<p>Special Information Requirement Rule 9.9.X</p> <p>9.9.X Stormwater management plans</p> <p>1. Application for subdivision in a new development mapped area must include a proposed stormwater management plan that demonstrates how Policy 9.2.1.Y will be achieved, unless such a plan has already been approved as part of an earlier subdivision. (Change F2-2)</p> <p>...</p>		
<p>3. Stormwater management plans must</p> <ol style="list-style-type: none"> be prepared by a chartered engineer or other suitably qualified person; be of a level of detail commensurate with the scale of the activity, complexity of stormwater management issues, and potential for adverse effects from stormwater. (Change F2-2 & Change F2-3) for a new development mapped area (NDMA), address the whole NDMA area, and be submitted along with the written approval of all owners of land within the new development mapped area unless they are the applicants. (Change F2-2) assess pre-development flows and post-development flows, generally based on the following rainfall events: <ol style="list-style-type: none"> for primary infrastructure, a 10% annual exceedance probability (AEP) for the critical storm duration for the NDMA and the critical storm duration and the catchment upstream of the point of discharge; and for secondary flow paths, a 1% AEP for the critical storm duration for the NDMA and the critical storm duration for the catchment upstream of the point of discharge; for the purposes of this requirement, 'critical storm duration' means the duration of rainfall event likely to cause the highest peak flows or water levels; 		

Rule 9.3.7.AA

9.3.7.AA Stormwater (Change F2-2)

- a. In a new development mapped area, all development that creates an impermeable surface must be connected to a communal stormwater management system that services the new development mapped area, except:
1. prior to the communal stormwater management system being installed, any development that creates less than 60m² of impermeable surface is exempt from this standard.
- b. Activities that contravene this performance standard are restricted discretionary activities. (Change F2-2)

Note 9.3.7.AAA

Note 9.3.7.AAA – General advice and other requirements outside of the District Plan (Change F2-2)

- a. In a new development mapped area, Policy 9.2.1.Y requires installation of a communal stormwater management system prior to development as part of the assessment of a subdivision consent. The requirements for stormwater management are set out in the Special Information Requirements – Rule 9.9.X. (Change F2-2)
- b. Clause E1 – Surface Water of the New Zealand Building Code (Building Regulations 1992, Schedule 1) contains requirements regarding buildings and sitework in relation to managing surface water and effects on other property.
- c. Development that will divert surface water may require resource consent under the Otago Regional Plan, Water.
- d. Discharge of stormwater to any Otago Regional Council scheduled drain or overland flow path is managed by the Otago Regional Council Flood Protection Management Bylaw 2012.
- e. If development affects the flow of surface water, this effect is also subject to the common law principle of natural servitude.
- f. Part 4 of the Dunedin Code of Subdivision and Development 2010 (Code of Subdivision) requires that design and construction of stormwater systems be undertaken in accordance with NZS 4404:2004 (now replaced by NZS 4404:2010), except as amended by the Code of Subdivision. This includes a requirement that stormwater systems be provided so that any new development results in an insignificant increase of runoff wherever possible (Clause 4.2.8).
- g. For further information on connections to the public stormwater network and for assistance with design requirements for stormwater management systems, please contact DCC 3 Waters on 03 477 4000 at the earliest opportunity. (Change F2-4)
