Subject: Re Proposed change of parking restrictions on Leith Street

Regulation Management Team

Thank you for your letter of 17 July

We endorse the conversion of two car parks from unrestricted all day parks to 30 minute parks.

As property managers we struggle to find short term parking in the university area. So this move to increase short term parking will make it easier for property managers, landlords and contractors that we engage for maintenance and deliveries to residential properties in the area.

We find as property managers that often the focus by decision makers regarding parking in the university area is more on the servicing of daily parkers to the area and towards supporting parking for businesses. Please don't forget about the residents that live in this mixed use area who do need permanent parking (not necessarily resident-only though), and all the other people like property managers and contractors that require short term parking to support those living in the area.
