S302.002	Alan David and David Eric Geeves & Nicola Jane Algie	4.2.3 Change A2 (Duplexes and two units in a single building) & Alternatives	Accept the change with amendments	Amend Change A2 (Duplexes and two units in a single building) so that:1. There should be a requirement that subdivision of duplex developments can only be completed once the new units have been constructed to avoid subdivisions being undertaken on empty land, and owners then attempting to seek consent for stand-alone houses on the subsequent sites (which may be as small as 200m²). The submitter suggests that there is a provision inserted into Variation 2 that requires the framing of both duplex units to be complete before the s224c certificate can be issued for an associated subdivision. 2. Duplex developments should be enabled through a suitable planning provision to share foul and stormwater drains (e.g. a drain in common). Without this provision it may be difficult to obtain a building consent for the duplex unit construction (in a duplex pair) while the site is still a single site (i.e. prior to the subdivision being completed). A drain in common between two duplex units is consistent with certain types of subdivision (e.g. Unit Title) and has the benefit of reducing house construction costs.

For the sake of clarity, this includes party walls.
S187.004	Dunedin City Council	4.2.3 Change A2 (Duplexes and two units in a single building) & Alternatives	Accept the change with amendments	Amend Change A2 (Duplexes and two units in a single building) to ensure that the new provisions for duplexes and two residential units in a single residential building are clear as to when a development constitutes one residential building or two residential buildings. Ensure that a physical connection between two residential buildings cannot be relied on to consider them a single residential building for the purposes of the density performance standard in Rule 15.5.2.
S187.005	Dunedin City Council	4.2.3 Change A2 (Duplexes and two units in a single building) & Alternatives	Accept the change with amendments	Amend Change A2 (Duplexes and two units in a single building) to review policy direction on why duplexes and 2 units in a single residential building are provided for on sites as small as 500m ² but not two standalone residential units is necessary to assist in consideration of applications for over-dense development or undersized site subdivisions.
S187.006	Dunedin City Council	4.1.7 Broad submissions regarding character, amenity and green spaces	Add a change	As an alternative to rejecting any changes that provide for intensification or new residential zoning in response to submissions opposing them, consider the need for additional plan provisions to better manage any adverse effects as an alternative.
S187.009	Dunedin City Council	4.1.3 Solid waste management as part of intensification and subdivision	Accept the change with amendments	Make any amendments required to Change A2 (Duplexes and two units in a single building) to ensure safe, accessible storage, movement and collection of solid waste and recycling bins is provided for all existing and future residential units where intensification of residential activity is provided for.
S187.010	Dunedin City Council	4.1.3 Solid waste management as part of intensification and subdivision	Accept the change with amendments	Amend assessment rules for subdivision and multi-unit development which enable consideration of "effects on efficient solid waste management" and such further, alternative, or consequential relief as may be necessary to fully give effect to this submission.
S187.011	Dunedin City Council	4.2.4 Change A3 (Minimum site size and minimum site area)	Accept the change with amendments	Review whether the density and minimum site size rules in Section 15 (15.5.2 and 15.7.4) should be amended to ensure that development potential is not reduced if 3 Waters require a separate service lot to be provided for shared services as part of a multi-unit development/subdivision.
S187.012	Dunedin City Council	4.2.5 Change B1 (Minimum site size averaging)	Accept the change with amendments	Review Change B1 (Minimum site size averaging) at Rule 15.7.4.2 to consider whether non-developable sites should be excluded from the minimum site size averaging calculation.
S187.013	Dunedin City Council	4.2.6 Change B3 (Density and units on existing sites of any size)	Accept the change with amendments	Amend Rule 15.5.2.1.k.i so that it is clear that the other performance standards in the Plan continue to apply in their own right and that this rule does not provide a blanket exception to those performance standards.
S187.014	Dunedin City Council	4.2.8 Change B6 (Exemptions to minimum site size for existing development)	Accept the change with amendments	Review whether the approach preventing family flats and ancillary residential units from meeting Change B6 (Exemptions to minimum site size for existing development) in Rule 15.7.4.1.j.X is appropriate in terms of the practicalities of implementing this rule and in terms of achieving the objectives of the Plan.
S187.015	Dunedin City Council	4.2.8 Change B6 (Exemptions to minimum site size for existing development)	Accept the change with amendments	Amend the wording of Rule 15.7.4.1.j.X to clarify the meaning of ‘habitable’ or otherwise clarify the extent to which a residential building must be completed to qualify for the exception.Review whether this change creates an undesirable loophole or may be exploited in a way that was not intended and does not meet the objectives of the Plan.
S187.016	Dunedin City Council	4.5.2 Change D1 (Broad changes linked to NDMA) & Alternatives	Accept the change with amendments	Amend Change D1 (Broad changes linked to NDMA provisions) to add an appendix to list the sites where a new development mapped area (NDMA) is being included in the Plan, including giving each mapped area a name.Add the NDMA names for each area to the pop-ups in the planning maps.
S187.018	Dunedin City Council	4.6.1 Change D2 (Transportation connections in subdivisions)	Accept the change with amendments	Amend Policy 6.2.3.Y (and make consequential amendments to assessment Rule 6.11.2.7) regarding provision of roads in subdivisions to ensure that the potential for development of more than one residential unit per site is a consideration in the assessment of whether a road will be required as part of a subdivision.
S187.019	Dunedin City Council	4.7.1 Change E1 (Residential zone descriptions)	Accept the change with amendments	Review the zone descriptions for Large Lot Residential 1 and 2 zones and Township and Settlement Zone in 15.1.1.5, 15.1.1.6, and 15.1.1.7 to clarify that some of these areas are not serviced for reticulated water supply or stormwater. Amend the reference to “stormwater storage” as this is not strictly correct.
S187.034	Dunedin City Council	4.1.3 Solid waste management as part of intensification and subdivision	Accept the change with amendments	Amend Change A3 (Minimum site size and minimum site area) to ensure safe, accessible storage, movement and collection of solid waste and recycling bins is provided for all existing and future residential units where intensification of residential activity is provided for.
S160.001	Dunedin Tunnels Trails Trust (Kate Wilson)	4.6.1 Change D2 (Transportation connections in subdivisions)	Accept the change with amendments	Amend Policy 2.2.2.4 to reference existing or planned cycle and walkways and preference for access to centres on easy (flat) terrain.
S160.002	Dunedin Tunnels Trails Trust (Kate Wilson)	4.1.5 Broad submissions on 3 waters and transport infrastructure; 4.6.1 Change D2 (Transportation connections in subdivisions)	Accept the change with amendments	Amend Policy 2.2.2.4.x to require ev car and ebike charging and priority in design for walking and cycling especially where the subdivision is in an area with low elevation to centres or existing or planned cycle ways.
S160.004	Dunedin Tunnels Trails Trust (Kate Wilson)	4.5.3 Change D4 (Social and recreational spaces)	Accept the change with amendments	Amend Policy 2.3.3.1 to refer to connectivity and mode shift, i.e. walking, cycling and public transport and support development where these facilities should be accessible.
S160.011	Dunedin Tunnels Trails Trust (Kate Wilson)	4.6.1 Change D2 (Transportation connections in subdivisions)	Accept the change with amendments	Add provisions so that off-site ev and ebike charging is provided for in subdivisions, especially where garages are not provided.

S273.005	Mark and Jacqui Taylor	4.2.3 Change A2 (Duplexes and two units in a single building) & Alternatives	Accept the change with amendments	Amend Change A2 (Duplexes and two units in a single building) to include these changes; 1. There should be a requirement that subdivision of duplex developments can only be completed once the new units have been constructed. This will avoid subdivisions being undertaken on empty land, and owners then attempting to seek consent for stand-alone houses on the subsequent sites (which may be as small as 200m²). The submitter suggests that there is a provision inserted into Variation 2 that requires the framing of both duplex units to be complete before the s224c certificate can be issued for an associated subdivision. 2. Duplex developments should be enabled through a suitable planning provision to share foul and stormwater drains (e.g. a drain in common). Without this provision it may be difficult to obtain a building consent for the duplex unit construction (in a duplex pair) while the site is still a single site (i.e. prior to the subdivision being completed). A drain in common between two duplex units is consistent with certain types of subdivision (e.g. Unit Title) and has the benefit of reducing house construction costs. Christchurch City Council allows shared drains for up to 4 residential units, and this seems to operate reasonably well.

S279.005	Victor and Fiona Nicholson	4.2.3 Change A2 (Duplexes and two units in a single building) & Alternatives	Accept the change with amendments	Amend Change A2 (Duplexes and two units in a single building) to include these changes; 1. There should be a requirement that subdivision of duplex developments can only be completed once the new units have been constructed. This will avoid subdivisions being undertaken on empty land, and owners then attempting to seek consent for stand-alone houses on the subsequent sites (which may be as small as 200m²). The submitter suggests that there is a provision inserted into Variation 2 that requires the framing of both duplex units to be complete before the s224c certificate can be issued for an associated subdivision. 2. Duplex developments should be enabled through a suitable planning provision to share foul and stormwater drains (e.g. a drain in common). Without this provision it may be difficult to obtain a building consent for the duplex unit construction (in a duplex pair) while the site is still a single site (i.e. prior to the subdivision being completed). A drain in common between two duplex units is consistent with certain types of subdivision (e.g. Unit Title) and has the benefit of reducing house construction costs. Christchurch City Council allows shared drains for up to 4 residential units, and this seems to operate reasonably well.
