

Still opposed to the rezoning and the link road.

I believe if there was a link road a lot of people will use it to get into Mosguel. As people I have talked to all said they would use the link road instead of the motorway. This would make the road really busy and would make it very difficult and very dangerous for me to get in & out of my driveway. Lowering the speed limit would not change the situation at all for me.

In winter time there is accidents that are not reported, as they get pulled out of the ditch by family or friends. So more cars coming over the hill will have more vehicles in the ditch.

I also purchased a bike to ride round my area and feel with all the traffic on Chain Hill & Morris Rd will make it even more challenging than it is now. Morris & Chain Hill Rd have no side area where you can ride & with the road being narrow & windy it becomes dangerous to ride these roads with a lot of traffic on them.

I feel with all the extra traffic especially heavy traffic, trucks etc will destroy the road. I have already reported the road subsiding which they have put a barrier up causing the road to be more narrow.

My concern is all the construction around my house could cause movement + who would pay for that the developer.

I bought my house because of the rural character, ~~as a~~ quiet lifestyle, few neighbours, if the rezoning goes ahead I will lose all that and will the DCC guarantee my rates will not change because the area has been rezoned.
