Hi all,

At this stage, the only possible change to what we initially proposed is to bring the stop a little further south so it is not directly in front of the Basilica building as this seems to be what is generating the most negative feedback.

In the diagram below, the red line is where it is currently set up as a temporary stop and where we initially proposed to install it. The green line is where we would like to alter our proposal – only a slight adjustment but it would mean it is not in front of the building and keeps it as close as possible to the intersection with Andersons Bay Road. Would you be able to provide any feedback on this?

@Sumit, do you have the contact details for the person you spoke to previously [REDACTED]? We would like to include them when we respond to feedback received.
