Proposed Variation 2 to the Dunedin District Plan Hearing Panel
Dunedin City Council
PO Box 5045
Dunedin 9054

By email: c/- Jenny.Lapham@dcc.govt.nz

Dear Jenny

Dunedin Second Generation Plan (2GP) Variation 2 Greenfield Zoning Hearing 4: Hearing Statement for Transpower New Zealand Limited (submitter reference 28)

Transpower New Zealand Limited ("Transpower") writes in relation to Hearing 4: Greenfield Zoning, that is scheduled to commence on Monday 15 August 2022.

Transpower's submission (reference 28.001) supports the notified (GF) rezoning sites and seeks that they are not located closer to the National Grid. The Section 42A Report recommends that Transpower's submission be accepted and comments as follows:

"I note that minor extensions are proposed by submitters to some of the originally notified sites. These are discussed below within the individual site sections of the report. None of the extensions are located within the National Grid Subdivision Corridor Mapped Area on the 2GP maps. For the requested sites, I have engaged with Transpower and have confirmed that none of these are near the National Grid."

Transpower supports recommendation given in the Section 42A Report and on that basis, Transpower does not wish to be heard in relation to the submission. That said, Transpower is available to respond to any questions the Hearings Panel may have.

Transpower requests that this letter be tabled to confirm this position for the Hearing Panel.

Should you require clarification of any matter, please contact Trudi Burney at Transpower (03 590 7126), or on the following email: trudi.burney@transpower.co.nz

Yours faithfully

Trudi Burney
Senior Environmental Planner
