Dear resident

### **Proposed changes to parking on Russell Street**

The Dunedin City Council (DCC) is proposing to change the layout of parking along Russell Street to provide increased on-street parking.

This proposal is highlighted in the diagram on the following page. We are proposing to change the layout across various sections of the southern half of Russell Street from parallel to angled parking. This would increase the parking within this area from 37 spaces to approximately 61 spaces. We are not proposing any changes to the existing restrictions as part of this proposal.

We would like to hear from nearby residents, as well as businesses and organisations interested in providing feedback about this proposal. Please visit [www.dunedin.govt.nz/parking-changes](http://www.dunedin.govt.nz/parking-changes) to provide feedback on the proposed parking changes. Submissions close at **midnight on Tuesday 29 October**.

*Please note: Your name and feedback may be included on papers available to the media and the public. The provision of your personal information is optional. Your feedback will only be used for the purpose of the proposed parking changes consultation. Council will collect, store, and use your information in accordance with the Privacy Policy – [www.dunedin.govt.nz/privacy-policy](http://www.dunedin.govt.nz/privacy-policy)*

Yours sincerely

Kia Ora,

Thank you for your feedback regarding Russell Street angled parking.

We appreciate your concerns regarding extending the angled parking outside 41 Russell Street. Unfortunately, we are unable to extend it this far south as this will create hazards for vehicles using the roundabout, particularly given that there are traffic islands present in the centre of the road. If we were to make this section of Russell Street angled parking, it will increase the chance of vehicles crashing into parked cars.

If you have any further feedback relating to Russell Street, please get in touch.

Regards,

Regulation Management Team
