

SECOND GENERATION DISTRICT PLAN

Summary table of minor and inconsequential amendments made following notification of the 2GP

August 2025

This table includes further amendments made in accordance with Schedule 1 clause 16(2) and clause 20A of the Resource Management Act.

Clause 16(2) of Schedule 1 allows a local authority to make an amendment to a proposed plan where the alteration "is of minor effect", and to "correct any minor errors", without needing to go through the submission and hearing process.

Clause 20A of Schedule 1 allows a local authority to make an amendment to an operative plan where the alteration is to "correct any minor errors", without needing to go through the submission and hearing process.

The changes of minor effect being made are minor wording changes to improve clarity of wording, where this does not change the meaning. This includes changes to ensure consistent terminology and phrasing is used throughout the plan where it is intended to mean the same thing (clarity error/change of minor effect to improve clarity).

Please note that while this report is dated August 2025, it covers changes made between June 2024 and August 2025. The 2GP was made partially operative on 19 August 2024. Some amendments covered in this report were made prior to 19 August 2024 under clause 16(2), and some after 19 August 2024, under clause 20A.

The DCC is currently undertaking a project to update the numbering of the 2GP. From 2019 to the present, as part of the resolution of appeals on the 2GP, a range of new provisions have been added to the Plan. To minimise changes to numbering while appeals were being resolved, these new provisions were given X, Y, Z placeholders rather than being numbered in the usual style. Now that most appeals have been resolved, 2GP numbering is now being updated, section by section, to remove these placeholders and replace them with standard numbering. Alongside this, minor clause 16/20A amendments are also being made as required. This report includes the renumbering of provisions in:

- Section 1.4 Definitions
- Section 4 Temporary Activities
- Section 5 Network Utilities
- Section 6 Transportation
- Section 8 Natural Hazard Mitigation Activities
- Section 10 Natural Environment
- Section 12 New Urban Land Provisions
- Section 15 Residential Zones
- Section 24 Dunedin International Airport
- Section 32 Stadium
- Section 33 Taieri Aerodrome
- Section 34 Campus
- Section 35 Wakari Hospital

Minor technical and formatting errors in the 2GP will be amended, when found, on an ongoing basis and will not be reported in a summary table. This includes, but is not limited to, incorrect spelling, missing macrons, and incorrect use of italics/bold. ePlan data loading errors that result in the 2GP Plan text being incorrect will be amended within 7 days of occurrence. Data loading errors found and amended later than this will be reported in a summary table.

Please note this is not a complete list of all minor and inconsequential amendments necessary to correct any errors in the Plan's text or in the 2GP Planning Map. The DCC will continue to identify these and make further amendments as required.
