

Māori Feedback received through in-person hui or email input

Feedback Māori residents

- Completion of the Peninsula Connect Project at Ōtākou – specifically from Ellisons Road to the Ōtākou Fisheries. That section of the road will wash out leaving residents access only on foot at low tide or over steep private farmland.
- Safe water at Ōtākou
- Rules that make a land-owner trying to save their frontage from erosion, difficult and expensive.
- Affordable housing
- Not enough safe healthy emergency housing
- Would like a land parcel offered to GP's into the area similar to business sweeteners offered.

Te Kāika

- Had previous issues missing out in the 10YP causing \$36k in legal fees for TK.
- Have lots of developments (particularly housing developments) wanting to go around the area of the TK office.
 - Have got the plans to do this.
 - Don't want to be a social housing provider but want to do the building.
- Want Social Housing around the old school groups and sell off to/build on behalf of Kāinga Ora.
 - This is particularly why TK needs a submission for the next 10YP and they want this social housing to be done within the next 10 years.
- This is important as it essentially goes back to caring for Dunedin residence who live in that area, or who find themselves needing social housing.

Te Rūnanga o Ōtākou

- Have little to no infrastructure out in Ōtākou, really from Portobello onwards.
 - This makes it hard to build or establish a business between Portobello and Taiaroa heads.
- Extend what DCC considers to be the 'City' and look at extending corridors out to more remote areas of Dunedin. Especially looking at cultural corridors, such as:
 - Koputai/ Port Chalmers
 - Taiaroa Heads
 - Blueskin – all of which offer great tourism mixed with huge cultural significance to Ōtepoti and mana whenua.
 - Further to this, links to Mosgiel (Taiari/Taieri); all four are services to the city and feed back into main central Dunedin.
- Embedded in infrastructure throughout Dunedin (unsure what this bit meant).
- Looking at infrastructure through Te Tiriti → need to explore that now (I suppose how there needs to be infrastructure out to marae etc. to be given the same rights as those closer to Dunedin Central; Art 3 of The Treaty and Treaty principles of active partnership)

Caring for residence who may not see full use/range of their rates as it currently stands because of the lack of infrastructure to their kāika or papakāika.
