Directors' Report For the Six Months Ended 31 December 2015

Results for the Six Months Ended 31 December 2015

	Group \$'000
Revenue	139,081
Surplus before taxation	13,471
Surplus after taxation	8,733
Net cash flow from operating activities	23,414
Total assets	1,147,051

Dividends

No interim dividend has been paid to the Dunedin City Council. This is consistent with the current year Statement of Intent.

Reserves and Retained Earnings

The hedging reserve has moved by \$0.833 million reflecting a change in the market value of interest and foreign exchange hedge valuations.

The carbon credit reserve has changed value by \$2.052 million reflecting movements in the valuation of carbon credits held.

The change in retained earnings comprises the after tax profit.

Review of Operations

Dunedin City Holdings

The parent company returned a net surplus after income tax for the half year of \$0.888 million compared to a surplus of \$1.9 million for the same period in 2014. The anticipated reduction in subsidiary dividends resulted in the decrease to the prior year.

Aurora Energy Limited

The operating surplus before tax and subvention was \$12.962 million (2014: \$13.757 million). An increase in revenue has been offset by additional costs associated with the capital maintenance programme that is underway. The Company continues to focus on operating a reliable and cost effective electricity distribution system.

Delta Utility Services Limited

The Company has reported a before tax profit of \$2.354 million (2014: \$2.970 million). Operating results for the six months, whilst down slightly to the same period last year, are in line with budgeted expectations. The Company continued to operate in asset management, energy and environmental divisions.

City Forests Limited

The Company produced an operating surplus before tax of \$7.012 million (2014: \$5.039 million). Improvements in both international and domestic demand along with a reduction in the value of the New Zealand dollar and a drop in costs, through international shipping rates and fuel costs, have had strong influences on the improved return.

Taieri Gorge Railway Limited

The Company reported a before tax loss of \$0.444 million (2014: loss of \$0.328 million). Passenger numbers are up 10.2%

Dunedin Venues Management Limited

An operating surplus before tax of \$0.461 million was generated (2014: loss of \$1.031 million). An increase in events and reduction in rent were the main factors in the change in operating performance.

Dunedin Venues Limited

An operating loss before tax and subventions of \$5.683 million (2014: \$6.219 million) occurred in the 6 months. Two main factors influenced the result for the period being, a reduction in interest expense in part due to a transfer of \$30 million debt to the Dunedin City Council partially offset by a reduction in rent revenue.

Dunedin International Airport

The Company has reported an operating surplus before tax of \$2.115 million (2014: \$1.543 million). A reduction in interest expense along with an unrealised gain in investments contributed to the favourable increase.

Corporate Governance

Dunedin City Holdings Limited is a Council Controlled Trading Organisation (CCTO). The directors' role is defined in the Local Government Act 2002. This states that all decisions relating to the operation of the CCTO shall be made pursuant to the authority of the directorate of the CCTO and its Statement of Intent (SI). The board is responsible for the preparation of the SI. In addition to the obligations of the Local Government Act, Dunedin City Holdings Limited is also covered by the Companies Act and governed by directors in accordance with the law and best practice. The shareholder reviews and approves the SI and three-year financial plan. Six monthly and annual reports of financial and operational performance are provided to the shareholder. In addition quarterly updates are provided to Councillors of the Dunedin City Council.

Directors' Interests in Contracts

Disclosures of interests made by directors are recorded in the company's interest register. Any transaction entered into was in the group's normal course of business and on its usual terms and conditions.

Directors' Insurance

In accordance with their constitutions, Dunedin City Holdings Limited and its subsidiary companies have arranged policies of Directors' and Officers' Liability Insurance which, together with a deed of indemnity, ensure that the directors will not incur any monetary loss as a result of actions undertaken by them as directors provided that they operate within the law.

Events Subsequent to Balance Date

The directors are not aware of any matters or circumstances since the end of the financial period not otherwise dealt with in this report or the financial statements that has significantly or may significantly affect the operation of Dunedin City Holdings Limited, the results of those operations or the state of affairs of the parent company or the group.

Dunedin Venues and Dunedin Venues Management Limited

Ownership of Dunedin Venues Limited and Dunedin Venues Management Limited was to be transferred from Dunedin City Council to Dunedin City Holdings Limited effective 1 July 2015. This transfer is yet to be formally completed pending final approval from the group debenture holders. These financial statements have been prepared on the basis of the share transfer having been implemented.

Outlook

The outlook for the group is positive for the full year. The consolidated group expects to exceed planned results for the year.

Financial Statements

The unaudited financial statements for the six months ended 31 December 2015 are attached to this report.

Principal Activities of the Group

Dunedin City Holdings Limited, as the parent company of the group, has the primary role of monitoring the operating performance of its subsidiary companies on behalf of the ultimate shareholder, the Dunedin City Council.

Dunedin City Holdings Limited is responsible for the overall strategic direction of the group and provides guidance and support to its subsidiary companies.

Dunedin City Holdings Limited endeavours to create an environment, and provide leadership, to optimise the performance of its Subsidiary and Associated Companies, so as to ensure each Company provides the maximum advantages in all respects to the shareholder, Dunedin City Council.

The principal activities of the subsidiary and associate companies are as follows.

- **Aurora Energy Limited** is New Zealand's sixth-largest electricity distributor, annually receiving 1,400GWh of electricity for distribution to more than 82,300 homes and businesses in Dunedin and Central Otago.
- City Forests Limited owns approximately 16,315 hectares of land from which forest products are grown, harvested and marketed.
- Dunedin City Treasury Limited provides the group with funding and financial services and manages the financial risks of the group.
- **Delta Utility Services Limited** is a multi-utility service provider specialising in delivering essential services to community, corporate and private customers. As asset manager to Aurora Energy Ltd it is responsible for the efficient distribution of electricity in Dunedin city and an increasingly large proportion of Central Otago.
- **Taieri Gorge Railway Limited** operates a tourist and community-orientated train on the Taieri Gorge railway line and provides other train services in the South Island, principally for charters and excursions.
- **Dunedin International Airport Limited** (Associate) operates the Dunedin Airport. It also farms adjacent land in partnership with sharemilkers and owns a small residential housing estate on land adjoining the airfield to the north.
- **Dunedin Venues Management Limited** is an event management company currently operating the Forsyth Barr Stadium and the Dunedin Centre for use for public and private events.
- **Dunedin Venues Limited** owns and is the landlord for Forsyth Barr Stadium.

Notes to the financial statements For the Six Months Ended 31 December 2015

1 Reporting Entity

The financial statements presented here are for the reporting entity Dunedin City Holdings Limited (the Company) and the consolidated financial statements of the group comprising Dunedin City Holdings Limited and its subsidiary and associate companies.

Dunedin City Holdings Limited is a Council Controlled Trading Organisation as defined in the Local Government Act 2002. The company, incorporated in New Zealand under the Companies Act 1993, is wholly owned by the ultimate parent of the group, Dunedin City Council.

The financial statements of Dunedin City Holdings Limited are for the six months ended 31 December 2015

The registered address of the company is 50 The Octagon, Dunedin 9016

Dunedin City Holdings Limited is a profit orientated entity.

These financial statements are presented in New Zealand dollars because that is the currency of the primary economic environment in which the company and group operate.

2 Significant Accounting Policies

Statement of Compliance

The condensed consolidated financial report is a general purpose financial report which has been prepared in accordance with NZ IAS 34: Interim Financial Reporting.

The condensed consolidated financial report does not include all of the information required for a full annual report.

The financial report is to be read in conjunction with the most recent annual financial report.

Basis of Accounting

The financial statements have been prepared on the historic cost basis, except for the revaluation of certain property, plant and equipment, investment properties, biological assets, derivative financial instruments, financial instruments classified as available for sale and financial instruments held for trading.

The accounting policies have been applied consistently by group entities.

Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities.

On acquisition, the assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired (i.e. discount on acquisition) is credited to profit and loss in the period of acquisition. The interest of minority shareholders is stated at the minority's proportion of the fair values of the assets and liabilities recognised. Subsequently, any losses applicable to the minority interest in excess of the minority interest value are allocated against the interests of the parent.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with those used by the group.

In preparing the consolidated financial statements, all inter-company balances and transactions, and unrealised profits arising within the consolidated entity, are eliminated in full.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Associate Entities

An associate is an entity over which the group is in a position to exercise significant influence, but not control or joint control, through participation in the financial and operating policy decisions of the investee.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting except when classified as held for sale. Investments in associates are carried in the consolidated balance sheet at cost as adjusted by post-acquisition changes in the group's share of the net assets of the associate, less any impairment in the value of individual investments. Losses of the associates in excess of the group's interest in those associates are not recognised.

Any excess of the cost of acquisition over the group's share of the fair values of the identifiable net assets of the associate at the date of acquisition is recognised as goodwill. Any deficiency of the cost of acquisition below the group's share of the fair values of the identifiable net assets of the associate at the date of acquisition (i.e. discount on acquisition) is credited to profit and loss in the period of acquisition.

Where a group company transacts with an associate of the group, profits and losses are eliminated to the extent of the group's interest in the relevant associate. Losses may provide evidence of an impairment of the asset transferred in which case appropriate provision is made for impairment.

Investment in Associates

The financial statements of the company (parent) include the investment in entities over which the company is in a position to exercise significant influence (associates) at the cost of the acquisition.

Non-current Assets held for Sale

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell. Depreciation on such assets will cease once classified as held for sale.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification

Goodwill

Goodwill arising on consolidation represents the excess of the cost of acquisition over the group's interest in the fair value of the identifiable assets and liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition.

Goodwill is recognised as an asset and reviewed for impairment at least at each reporting date. Any impairment is recognised immediately in the income statement and is not subsequently reversed.

On disposal of a subsidiary, associate or jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

Any negative goodwill arising on an acquisition is recognised directly in profit or loss.

Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business, net of discounts and GST.

Revenue from services rendered is recognised when it is probable that the economic benefits associated with the transaction will flow to the entity. The stage of completion at balance date is assessed based on the value of services performed to date as a percentage of the total services to be performed.

Sales of goods are recognised when significant risks and rewards of owning the goods are transferred to the buyer, when the revenue can be measured reliably and when management effectively ceases involvement or control.

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Dividend income from investments is recognised when the shareholder's rights to receive payment have been established.

Construction Contracts

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date. This is normally measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as Lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight line basis over the term of the relevant lease.

The Group as Lessee

Assets held under finance leases are recognised as assets of the group at their fair value or, if lower, at the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability.

Rentals payable under operating leases are charged to income on a straight line basis over the term of the relevant lease.

Benefits received and receivable as an incentive to enter into an operating lease are also recognised on a straight-line basis over the lease term.

Foreign Currencies

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements the results and financial position of each entity are expressed in New Zealand dollars, which is the functional currency of the Council and Group.

Transactions in currencies other than New Zealand dollars are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing on the balance sheet date. The group does not hold non-monetary assets and liabilities denominated in foreign currencies.

In order to hedge its exposure to certain foreign exchange risks, the group may enter into forward contracts and options (see below for details of the group's accounting policies in respect of such derivative financial instruments).

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to prepare for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in the income statement in the period in which they are incurred.

Government Loans

Forestry term liabilities include Ministry of Agriculture and Forestry Suspensory Loans and Ministry of Agriculture and Forestry Repayable Loans. Interest is calculated annually on the suspensory loans. However, the interest and principal may be forgiven when the loan conditions are met. Interest is also calculated annually on the repayable loans.

Employee Entitlements

Entitlements to salary and wages and annual leave are recognised when they accrue to employees. This includes the estimated liability for salaries and wages and annual leave as a result of services rendered by employees up to balance date at current rates of pay.

Entitlements to long service leave and retirement gratuities are calculated on an actuarial basis and are based on the reasonable likelihood that they will be earned by employees and paid by the group.

Goods and Services Tax (GST)

Revenues, expenses, assets and liabilities are recognised net of the amount of goods and services tax (GST), except for receivables and payables which are recognised inclusive of GST.

Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The group's liability for current tax is calculated using tax rates that have been enacted by the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Property, Plant and Equipment

Property, plant and equipment are those assets held by the group for the purpose of carrying on its business activities on an ongoing basis.

All property, plant and equipment, apart from forestry land, is stated at cost less any subsequent accumulated depreciation and any accumulated impairment losses.

Forestry land is stated at its revalued amount, being the fair value at the date of revaluation, determined from market-based evidence by appraisal undertaken by Quotable Value NZ.

Revaluations are performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the balance sheet date.

Any revaluation increase is credited to the appropriate revaluation reserve, except to the extent that it reverses a revaluation decrease previously recognised as an expense, in which case the increase is credited to the income statement to the extent of the decrease previously charged. A decrease in carrying amount arising on the revaluation of such land is charged as an expense to the extent that it exceeds the balance, if any, held in the revaluation reserve relating to a previous revaluation of that asset.

Self-constructed assets include the direct cost of construction to the extent that they relate to bringing the fixed assets to the location and condition for their intended service.

Depreciation is charged so as to write off the cost or valuation of assets, other than land, forestry land, properties under construction and capital work in progress, on the straight-line basis. Rates used have been calculated to allocate the assets cost or valuation less estimated residual value over their estimated remaining useful lives.

Depreciation of these assets commences when the assets are ready for their intended use.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Depreciation on revalued assets, excluding land, is charged to the profit and loss. On the subsequent sale or retirement of a revalued asset, the attributable revaluation surplus remaining in the appropriate property revaluation reserve is transferred directly to retained earnings.

Assets held under finance leases are depreciated.

Depreciation rates and methods used by all companies except for City Forests Limited are as follows:

	Rate	Method
Buildings	1% to 17%	Straight Line
Metering Equipment	7% to 100%	Straight Line
Electricity Network Assets	1% to 20%	Straight Line
Plant and Equipment	1% to 50%	Straight Line
Motor Vehicles	5% to 33%	Straight Line
Railway Assets	1% to 50%	Straight Line
Office Equipment and Fittings	5% to 48%	Straight Line
Construction in Progress	no depreciation charged	
Software	20% to 100%	Straight Line

Depreciation rates and methods used by City Forests Limited are as follows:

	Rate	Method
Buildings	2% to 3%	Straight Line
Roads	5% to 24%	Diminishing Value
Bridges	2% to 2.4%	Diminishing Value
Plant and Equipment	6% to 80.4%	Diminishing Value
Fences	10% to 13%	Diminishing Value
Motor Vehicles	9.6% to 36%	Diminishing Value
Office Equipment	10% to 60%	Diminishing Value

Forests

The fair value of the forest, exclusive of the forest land, is determined at each reporting date. Fair value is equivalent to the NZIF Forest Valuation Standards definition of market value. Fair value is determined using the discounted cash flow methodology and, in using this method, financing costs and replanting costs are excluded. The method first determines the current market value of the collective forest and land resource, with land then subtracted at its current market value to provide the value of the forest asset.

The valuation takes into account changes in price over the accounting period as well as the quantity of trees harvested and the growth that has occurred in the forest. Any change in forest valuation is recorded in the income statement.

Derecognition of Non-Financial Assets

Forestry assets and items of property, plant and equipment are derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset

Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the income statement in the year the item is derecognised.

Investment Property

Investment property is property held to earn rentals and/or for capital appreciation. All investment properties are stated at fair value, as determined annually by independent valuers at the balance sheet date.

Gains or losses arising from changes in the fair value of investment properties are recognised in the income statement for the period in which the gain or loss arises.

Intangible Assets

Goodwill represents the excess of the purchase consideration over the fair value of the net tangible and identifiable intangible assets, acquired at the time of acquisition of a business or an equity interest in a subsidiary or associate company. Goodwill is tested annually for impairment.

Software is recognised at cost and amortised to the Income Statement on a straight line basis over the estimated useful life, which is a maximum period of five years.

Research and Development Expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

Patents and Trademarks

Patents and trademarks are measured initially at purchase cost and are amortised on a straight line basis over their estimated useful lives.

Impairment of Assets excluding Goodwill

At each balance sheet date, the group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is immediately recognised as an expense, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease to the extent of any previous revaluation increase for that asset (or cash generating unit) that remains in the revaluation reserve. Any additional impairment is immediately transferred to the income statement.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is immediately recognised as income.

Inventories

Inventories are stated at the lower of cost and net realisable value. Log inventories are initially valued at fair valueless estimated point of sale costs. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Financial Instruments

Financial assets and financial liabilities are recognised on the group's balance sheet when the group becomes a party to the contractual provisions of the instrument.

Trade and Other Receivables

Trade and other receivables are stated at cost less any allowances for estimated irrecoverable amounts.

Investments

Investments are recognised and derecognised on a trade date where a purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at cost, including transaction costs.

Investments in Debt and Equity Securities

Investments in debt and equity securities are financial instruments classified as held for trading and are measured at fair value through profit and loss at balance date. Any resultant gains or losses are recognised in the income statement for the period.

Trade and Other Payables

Trade and other payables are stated at cost.

Borrowings

Borrowings are initially recorded net of directly attributable transaction costs and are measured at subsequent reporting dates at amortised cost. Finance charges, premiums payable on settlement or redemption and direct costs are accounted for on an accrual basis to the Income Statement using the effective interest method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

Financial Liability and Equity

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the group after deducting all of its liabilities.

Derivative financial instruments and hedge accounting

The group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates, the price of oil and interest rates. The group uses foreign exchange forward contracts, foreign exchange options and interest rate swap contracts to hedge these exposures.

The group does not use derivative financial instruments for speculative purposes. However, derivatives that do not qualify for hedge accounting, under the specific NZ IFRS rules, are accounted for as trading instruments with fair value gains/losses being taken directly to the income statement.

The use of financial derivatives in each entity within the group is governed by the Dunedin City Council's Treasury Risk Management Policy (approved December 2014). The policy provides written principles on the use of financial derivatives.

Derivative financial instruments are recognised at fair value on the date the derivative is entered into and are subsequently remeasured to their fair value. The fair value on initial recognition is the transaction price. Subsequently fair values are based on independent bid prices quoted in active markets as provided for us by our banking counterparties.

Changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cash flows are recognised directly in equity and any ineffective portion is recognised immediately in the Income Statement. If the cash flow hedge of a firm commitment or forecasted transaction results in the recognition of an asset or a liability, then, at the time the asset or liability is recognised, the associated gains or losses on the derivative that had previously been recognised in equity are included in the initial measurement of the asset or liability. For hedges that do not result in the recognition of an asset or a liability, amounts deferred in equity are recognised in the income statement in the same period in which the hedged item affects net profit or loss.

For an effective hedge of an exposure to changes in the fair value, the hedged item is adjusted for changes in fair value attributable to the risk being hedged with the corresponding entry in the income statement. Gains or losses from re-measuring the derivative, or for non-derivatives the foreign currency component of its carrying amount, are recognised in the income statement.

The fair value of a hedging derivative is classified as a non-current asset or liability if the remaining maturity of the hedge relationship is more than twelve months and as a current liability if the remaining maturity of the hedge relationship is less than twelve months.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the income statement as they arise. Derivatives not designated into an effective hedge relationship are classified as current assets or

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised, or no longer qualifies for hedge accounting. Any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecast transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to the income statement for the period.

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not carried at fair value, with unrealised gains or losses reported in the income statement.

Carbon Credits

Emissions units held are treated as intangible assets, and initially recorded at:

Cost in the case of purchased units.

Government granted units are recognised at fair value (initial market value) when there is reasonable assurance that the company will comply with the attached conditions and the grant will be received.

Emissions unit fair value is marked to market (revalued) annually at 30 June subsequent to initial recognition and annually thereafter. The difference between initial fair value or previous annual revaluation and disposal or revaluation value of the units is treated as revenue if positive or expense if negative. Emissions obligations are recognised as a current or future liability depending on the legislated liability period. Emissions liability is recorded at the market value of emissions units at the end of the period. Increases in emissions liabilities at 30 June are treated as expenses and reductions are treated as revenue.

Provisions

A provision is recognised in the balance sheet when the group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation.

Provisions for restructuring costs are recognised when the group has a detailed formal plan for the restructuring that has been communicated to affected parties.

Critical Accounting Estimates and Assumptions

The group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to carrying amounts of assets and liabilities within the next financial period include:

- impairment of investments in subsidiaries, associate companies and jointly controlled operations;
- valuation of forestry assets;
- valuation of derivative financial instruments (note 24);
- · carrying value of the deferred tax liability.

Discontinued Operations

Discontinued operations consist of business units and other non-core assets that have either been sold or discontinued during the year or are classified as held-for-sale at year end.

Changes in Accounting Policy

There has been no change in accounting policy. Policies for the current year and comparative year have been applied on a consistent basis, as the below standards introduced or amended did not materially impact the Group.

Seasonality of Operations

The profitability and cash flow of the group contains seasonal elements. Some businesses of the group have quite marked seasonal elements, but overall the winter business of the electricity distribution company has a bigger impact on the group than the summer flows of the tourism based business of Taieri Gorge Railway and the summer bias of the Delta Utility Services contracting activity.

26 FINANCIAL RISK

Dunedin City Treasury Limited provides services and loans to the businesses and the shareholder, co-ordinates access to domestic financial markets, and monitors and manages the financial risks relating to the operations of the group. These risks include market risk, credit risk and liquidity risk.

The condensed interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the group's annual financial statements at 30 June 2015. There have been no changes in the risk management strategies or in any risk management policies since year end.

Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- **Level 1** Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- **Level 2** Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).
