---

Hi Hamish

Here are the answers to your parking meter questions. How early a start did you have today?!

Thanks

Andrea Jones

**Subject:** Parking machines

Afternoon,

I'm compiling a story to be published over summer on parking machines/meters.

Are you able to provide the following under the Official Information Act?

1. How much has the council earned from parking machines/meters the last financial year?

Revenue from on street and off street parking meters for 2015/16 was \$4,266,700.

Revenue from parking machines in DCC parking buildings was \$688,000.

Please note these figures do not take into account the cost of providing parking services.

2. Was this ahead of budget?

No, this was \$32,000 less than budgeted.

3. Can you provide a breakdown of payment for parking, ie coins, cards, text a park?

Meters (on and off street) - cash 76%, txt a park 6%, credit/debit card 18%.

Parking buildings - cash – 56% credit/debit/eftpos 44%.

4. How many machines do you operate?

Seven car park building pay machines, 343 pay and display machines.

5. Are you able to reveal which machine, or street, earned the most \$\$\$?

Machines in car parks earn the most revenue. In terms of on street parking, the parks in the centre of the Octagon earn the most revenue.

6. Can you say where the cheapest park is, and the most expensive?

Prices are available on our website -

<http://www.dunedin.govt.nz/services/parking/where-you-can-park>.

7. Anything else you would like to add?

You might be interested to know the DCC owns about 2500 on street car parks.
