**Attachments:** TransExport WASTE to landfill 1apr19 to 31Mar20xlsx.pdf; Total volume or weight diverted from landfill.pdf

Kia ora [REDACTED]

I refer to your request dated 9 November 2023 and refined email dated 10 November 2023 in which you asked for the following information .

I have provided our responses under each of your questions:

Data for the year ending March 2020 for the following:

1. Total volume or weight of waste taken to the landfill.  
*98,420.71 net tonnes*  
*Please see the attached spreadsheet – Product Group Summary*
2. Total volume or weight diverted from the landfill.  
*7,842.06 tonnes*  
*Please see the attached spreadsheet – Total Volume or weight diverted from Landfill*

I trust this answers your query.

Kā mihi

*Lynne*

Subject: RE: LGOIMA

Kia ora Lynne,

Thank you for getting back me and I understand the limitations/gaps explained.

Is it possible to disaggregate the data available further e.g.:

- Total waste volumes or weight taken to landfill by sector and waste type
- Total waste volumes or weight diverted from landfill by sector and waste type

If not, the aggregated totals previously requested will still be helpful.

Please let me know if you have any questions.

Best wishes,

[REDACTED]

Kia ora [REDACTED]

Your below LGOIMA was sent to the Dunedin City Council to respond to.

This has been forwarded to our waste department for response and they have asked me to contact you and advise that we can only provide information in relation to the Council waste collections and the Council owned Green Island Landfill.

We don't hold the information for private waste service providers or private landfills or for waste exported out of Southland.

Please confirm your acceptance of this.

Thank you

The main question we would like to answer is: "What emissions reductions could we anticipate from circular approaches in New Zealand, and what are the best areas of opportunity for emissions reduction and wider impact?" Please see more details on the specific research project in the attached letter of introduction.

We are seeking data for the year ending March 2020 for the following:

1. Total volume or weight of waste collected.
2. Total volume or weight of waste taken to landfill.
3. Total volume or weight diverted from landfill.

Kā mihi
