**Subject:** Re: Conservation projects information request  
**Attachments:** Copy of Bio Fund Summary - LGOIMA.xlsx

Kia ora [REDACTED]

I write about your LGOIMA request received 31 July 2024.

Following clarification, please find below and attached the information requested.

Council has provided both grant funding and in-kind contributions to projects related to conservation, biodiversity, environmental and restoration.

Over the past three years, in-kind funding has been provided to coastal community groups (Brighton Trapping Group, the Halo Project, and the Otago Peninsula Biodiversity Group) through the provision of trapping hardware, training, and support. The cost of the devices supplied to these groups combined is \$19,905.00.

The attached spreadsheet outlines the projects supported in the last three years through grants from our Biodiversity Fund, including funding awarded to projects, but the project is not yet complete. Further information on the Biodiversity Fund projects and their report backs can be found on the Grants Subcommittee agendas in May and November each year on the DCC Website <https://www.dunedin.govt.nz/council/council-meetings/agendas-and-minutes>

I hope this assists with your study and we would be interested in any publicly available outcomes from your research.

Kā mihi

Hi Rebecca

I understand now; that will be fine thank you.

Cheers,

Kia ora 

Thank you for your email.

However, the Dunedin City Boundary North is just past Waikouaiti (Moeraki is around 30km above the Dunedin City Boundary).

And the Dunedin City Boundary South is not quite down to Taieri Mouth (which is over the bridge in the picture)

Are we able to narrow the request to within the Dunedin City Boundary limits.

Kā mihi

Hi Rebecca,

We could narrow it to Moeraki to Taieri Mouth?

Best,

Thank you for your request.

To assist us with your request can you please provide maps of the Otago Coastal Catchment areas you are requesting the information for or is it for the area as per the link below but within the Dunedin City Boundary.

<https://portal.opentopography.org/lidarDataset?opentopoID=OTLAS.072022.2193.1>

I look forward to hearing from you.

**Subject:** Conservation projects information request

---

Hello to whomever gets landed with this inquiry email!

Otago Rock Lobster Industry Association as part of our "working with communities" strategic deliverables is working to explore the projects and opportunities that exist in Otago for collaboration and partnership in the environmental space.

While we are primarily interested in the marine space, the project we are looking at requires an overall "snapshot" of all types of environmental projects in our coastal Otago region. By understanding what is already underway and what central, regional and local government are funding (and then other Trusts and Foundations) we can see whether there is an ability to create a tool to streamline how the projects work together for an improved environmental outcomes and improved community wellbeing.

I can see on the DCC website the annual funding allocations for environmental grants (eg the contestable grants calendar) but I am wondering if there is a better data set that gives information on the environmental initiatives that have received public funding in the last 3 years. We would like to see all the fabulous initiatives in Otago to see where our project could add value and simplify funding streams.

We are working with the Otago University and other conservation organisations in these early discussions, however, as our local council I assume you may have some form of repository or other open data portals that could help.

Put simply, this is **an information request for a list of all DCC projects related to conservation/biodiversity/environment/restoration in the Otago Coastal Catchment that have occurred in the last 3 years and the corresponding funding allocation that the projects have received if possible.**

Thank you in advance,

---
