Good afternoon Jenny.

Thanks for this information. We really appreciate it.

Kind regards

I refer to your e-mail of 11 September 2024 requesting information on road signage gantries.

Our response to your request is below.

The Dunedin City Council has one gantry attached to the Roslyn overbridge.

- It is 7m long
- We believe the height recorded is height above road at 5m
- It was installed on 17/01/2023
- It has a replacement cost of \$31,200.74. The gantry itself cost just over \$9k with the rest of the cost being signs, installation by crane and traffic management.
- It is Aluminium.
- It has a useful life of 50 years, we cannot provide information regarding the design life.
- The gantry will be maintained through the maintenance contract with Fulton Hogan.
- The Brackets were made by WSP
- The Sign was provided and installed by Fulton Hogan
- At this stage we are not planning any more gantries, there are some projects that may require them but they are not yet advanced enough to know if they will be required.

Photos of the gantry and a map of where it is within the city is attached.

The Council Transport staff have suggested that NZTA or the REG group could potentially pull out the entire country's gantry data once all RCAs and NZTA have transitioned to AMDS. It might be useful for you to contact them direct.

I trust this answers your queries
