Subject: RE: LUC-2020-631 Request for department comments - Recreation Reserve

Hi Kirstyn,
No issues with this proposal except for the following change to the species lists.

Re-vegetation mix – replace *Muehlenbeckia astonii* with *Hebe elliptica*.
Muehlenbeckia astonii is not native to the Dunedin area so is ok in amenity planting (e.g. the screening mix) but the revegetation mix should be stocked with plants native to the area and appropriate for the site.

Cheers, Richard
