#### Good morning Phil

Please find attached the Arborist's report on the tree as requested and photos showing the junction he has spoken of. The branch that was there, fell quite a long time ago and left 2 or 3 10cm high jagged edges which we just cut off to avoid injuries.

As per the attached request for information form, I think the tree meets the criteria for removal based on clauses c & e of Policy 7.2.1.2.

Clause c. - as discussed in the report there is risk to our house should the tree split at the junction as shown. It would definitely fall on both our power and phone lines and then the house. This may not be going to happen 'tomorrow' so to speak, however, the risk does seem to be present & I'd prefer we didn't wait for that to happen.

Clause e. - I think this is totally true... we have put off doing any landscaping of our property at the front, due in part to the tree roots and the damage they have done in the past (blocked main drain to house, cracked the driveway and reduced and stunted growth of current plantings) and problems it will cause in the future, to new landscaping eg. driveway, path, fence, plantings etc. We believe the updated landscaping will have significant positive effects in respect of the efficient use of land. As it is, the only item to be seen is our very large cabbage tree, with its very ugly scarring & potential risk etc. When walking past, people don't even see the tree, all they see is a trunk which does not have much in the way of aesthetic value. If this is removed we can utilise our whole section, beatify it and keep it flood free also as we're planning to put a lot of extra soil, grass etc to help with drainage.

We also have direct neighbours who have a smaller cabbage tree that they are keen to see mature. Would this not fill the 'aesthetic' gap that our tree is seen to have filled in the street & neighbourhood? Our tree is clearly very old and some new life in the form of a younger tree seems to be a very good thing.

Apart from an Arborist report, I was unsure what/who you meant in b) of your point 1. regarding Requested information. If there is someone or something else you can suggest, please let me know so I can do this asap.

Kind regards Penelope

Subject: RE: LUC-2023-253, Removal of significant tree at 17 Sandringham Street

Hi Penelope,

I am still waiting for comments from the consultant council arborist but will be able to request further information from you as soon as I have his comments. I have enquired with the arborist today as I expected to receive comments last week.

Please be aware that is a non-complying activity with quite a high bar to reach in terms of whether the district plan allows granting - so a successful application is not certain.

Also, the district plan requires that this is publicly notified via Proposed 2GP Rule 7.4. (1). This means that after the further information aspects have been addressed, that council would look to notify the application next.

Please contact me if you have any questions.

Kind regards,

Phil

| Good afternoon Phil                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thank you for your email last Friday, that's fabulous that we're underway. I don't have any specific questions but am keen to assist where/if I can.                                                                                                                                    |
| I would really appreciate your updates as you go as I have a landscaper, concreter, fencer and tiler waiting to hear so we can coordinate them all to complete our landscaping plans. We appreciate these plans may have to be altered depending on the outcome of our tree submission. |
| I look forward to hearing from you.                                                                                                                                                                                                                                                     |
| Kind regards                                                                                                                                                                                                                                                                            |

| Kia ora Penelope,                                                                                                                                                                                                                                                                       |
| I have been allocated your application for processing. I will be in touch early next week about this application, and as I make progress.                                                                                                                                               |
| The application was lodged on 27 June 2023 and will take up to 20 working days to process, unless I require further information and need to place the application on hold.                                                                                                              |
| Please feel free to ask any questions.                                                                                                                                                                                                                                                  |
| Kind regards,                                                                                                                                                                                                                                                                           |
| Phil                                                                                                                                                                                                                                                                                    |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                |              |              |                    |                                      |

Kia Ora,

To whom it may concern

Attached is the ISA tree risk/health assessment form for the Cordyline australis at 17 Sandringham St Dunedin. Tree no T990 .Not all of this form can correlate to a cordyline in the same way as an actual tree but I have attempted.

The Overall health of the Cordyline in my professional opinion is in slow decline. It is sporting multiple wounds around the base of the trunk right up to chest height where there has been a large limb removed previously. This wound has rot actively spreading through the trunk with two large heavily weighted stems on either side. If there was a failure with that main union essentially half the tree would fall, either on the house or the phone line and footpath.

The tree is definitely not in it great shape, I wouldn't say it is an immediate high risk but there is no easy way to remedy its fault. A heavy prune of the canopy would possibly reduce the risk of its impact upon failure but the damaged union would still remain and continue to hinder the trees health not really accomplishing much. I believe the tree has Past its best days.

Kā mihi,

Dylan King
